

Eldridge Kaboth

Full-stack Developer · TypeScript · React · Next.js · AI

Bremen, Germany · eldridgekaboth@gmail.com
eldridgekaboth.dev · github.com/EldridgeJr · linkedin.com/in/eldridge-kaboth

Profile

Full-stack developer focused on modern web applications, backend integration and AI-powered features. Builds digital products independently, from concept and UI/UX design through deployment. Hands-on experience with TypeScript, React, Next.js, SwiftUI and Supabase/PostgreSQL. Took technical ownership of a software product as co-founder and lead developer. Combines user-focused development with communication and teamwork skills gained in sales and youth support.

Relevant Experience

- Web Developer · Releafe · Remote**

Apr 2026 – Aug 2026

 - Developed and maintained a responsive company website, focusing on frontend development, user experience, performance and usability.
- Co-Founder & Lead Developer · Court99 · Legal Tech** [GitHub](#)

Dec 2025 – May 2026

 - Designed and developed a web platform to help clients prepare for court hearings, with courses, mock hearings and progress tracking.
 - Responsible for frontend architecture, UI/UX, data integration and deployment using TypeScript, React, Supabase and PostgreSQL.
 - Translated requirements from a regulated, language-sensitive setting into clear, user-focused product features.
- Youth Support Worker · Wildfang Plus GmbH · Bremen**

Jun 2023 – Present

 - Independent case management, accurate documentation and collaboration with public authorities and multidisciplinary partners while handling sensitive personal information.

Selected Projects

- Resumind · AI-Powered Resume Analysis · Web** [GitHub](#)

2025 – 2026

 - React application with AI-powered document analysis, ATS scoring, categorized feedback, authentication, file storage and an application tracker; built with TypeScript, React Router, Tailwind CSS, Zustand and Puter.js.
- Portfolio · Interactive Web Experience · Web** [GitHub](#)

2026

 - Independently developed a portfolio website with Next.js, React and TypeScript, featuring interactive GSAP animations and 3D/WebGL elements built with Three.js and React Three Fiber.
- Nexo · Options Trading Companion · iOS + Backend** [GitHub](#)

2026

 - Native SwiftUI app with live watchlists, server-side push alerts via Cloudflare Workers, AI-generated market briefings through the Claude API and shareable profit-and-loss cards.
